

SMART MIRACLE END MILLS

CARBIDE

VQXL **NEW**

End mill, Short cut length, 4 flute, Long neck

RECOMMENDED CUTTING CONDITIONS

Side milling

| Work material | | Carbon steel, Alloy steel, Austenitic stainless steels, Titanium alloys Cobalt chromium alloy, Copper, Copper alloy | | | | | Heat resistant alloys, Pre-hardened steel, Hardened steel | | | | |
|------------------------------------|-----|--|---------------------------------|--------------------|----------------------|----------------------|---|---------------------------------|--------------------|----------------------|----------------------|

Depth of cut

- 1) SMART MIRACLE Coating is not energized because of its nature. Therefore, an external contact (voltaic type) tool setter cannot be used. An internal contact (non-voltaic) type or laser type tool setter is recommended to measure the length of the tool.
- 2) Effective cutting of stainless steel, titanium alloys and heat-resistant alloys etc. can be achieved with the use of emulsion.
- 3) When the depth of cut is smaller than shown the revolution and feed rate can be increased.
